Water Damage can happen in your home or business at any time. These days, you need a professional restoration company that stands by your side from the beginning until the end. That's why we offer experienced flood technicians who can restore your property and life back to normal.

Water Removal Service 24/7

Flood Restoration Service – “Flood Service Now” always stands ready to take your call because we're always open ! So if you just experienced a flood or fire and need it cleaned up and quick, we dispatch our first responders who arrive at your location within the hour. Upon their arrival, immediate damage assessment and a no obligation estimate is drawn up.

As you can imagine, we've seen many floods and fires strike over the years, catching property owners off guard and causing everything from small mop ups to residential or commercial soakers. We've also seen the stress it can cause to the property owners. One thing is for sure... you cannot predict a disaster! but... you can always count on San Diego Flood Restoration Service responding quickly and with a reliable cleanup crew.

Water extraction is usually the first immediate service provided, which reduces further damage to your property. Sewage affected property and damaged items are either cleaned and/or removed if needed, following is the structural drying. Other restoration work may be needed and further assessments of the damage are done within the 3 to 5 day structural drying period. Work could include services such as mold remediation, asbestos removal and possible reconstruction for full restoration if warranted; restoring your home or business back to its original condition.

Damage from water leaks and pipe breaks require immediate water extraction, fast clean up and dry out. Immediate and important steps need to be taken to save your property from further damage and mold & mildew. Water damage issues require help from expert technicians whom handle all types of disasters such as: water heater leaks, toilet overflows, sewer spill and the like. Water removal and structure drying is needed initially and right away.

Insurance policies differ from one another and each dictate the terms of coverage. In most cases, insurance covers the costs to remedy your property damage. Many years of flood experience in making fair and reasonable appraisals of damaged property are employed, preparing the necessary reports required in order to settle a timely claim.

Emergency clean up assistance for unexpected water damage of all kinds is available, ranging from minor plumbing leaks to major bursts, activated fire sprinklers, sewage backups, toilet and bath overflows or rain water entering your home. San Diego Flood Restoration Service is just a call away.

San Diego Flood Restoration Service probably more than most understands that floods and fires can strike any time without warning. When it does, you need a reliable and experienced water removal service and fast. We dispatch experienced 1st responders to your location right away day or night within 60 Minutes.

Damage from water leaks and pipe breaks require fast water removal, clean up and dry out, and important steps need to be taken to save your property from mold and mildew. Water damage issues require help from expert technicians who handle all types of disasters such as broken pipes, water heater leaks, toilet overflows, sewer spill and the like. Water removal services are needed initially without delay.

Water Removal & Cleanup

After a fire, flood or plumbing failure, fast action to dry out and restore water damaged areas can mean saving thousands of dollars. Certified Technicians will extract the water from your carpet or hardwood floor and salvage as much material as possible. They will setup drying equipment to quickly dry the affected areas. Water removal must be done immediately after a flood occurs or further damage will occur as it soaks in.

Water damage services include the inspection of the affected area(s) with water sensing equipment such as moisture meters and other infrared tools in order to determine the source and extent of the damage, and entire affected area. San Diego Flood Restoration Service would then be dispatched to the job location in order to dry the structure, sanitize any affected or cross contaminated areas, and deodorize all affected areas and materials. After the labor is completed, water damage equipment including, but not limited to, air movers, air scrubbers, dehumidifiers, wood floor drying systems, and sub floor drying equipment is left in the residence for maximum efficiency.

After a period of two to three days usually, the labor work is mostly completed. Then, a reevaluation of the property is taken to monitor the drying process, and any equipment not further needed is removed as to keep the charges under control. A quote for the restoration process is then provided. Call San Diego Restoration Service today.
